SUMMARY

As a software developer, I excel at creating and maintaining software applications using programming languages such as JavaScript, HTML, CSS, SQL. I am passionate about software development and have hands-on experience with the entire software development life cycle (SDLC), from planning and design to testing and deployment, thanks to my courses at Boolean.

In addition to my technical skills, I am a strong communicator and problem solver. I work effectively with team members to develop high-quality software solutions, utilizing my expertise in object-oriented programming and familiarity with development technologies such as Git, Kanban, and Trello. With my diverse skill set and dedication to the field, I am confident in my ability and will be a dedicated member of a SD team.

I'm excited to advance my skills as a software developer, increase my familiarity with cutting-edge technology, and help your business succeed.

RELEVANT EXPERIENCE

Junior Software Developer Trainee

Boolean UK   09/2022 - 03/2023

- A full-stack software development bootcamp that lasted six months and more than 900 hours and covered several programming languages and tools.
- The curriculum was designed with a full-stack developer in mind and contains, among other things, JavaScript, Node.js, React.js, RESTful APIs, and databases.
- Learned every facet of software development, from creating sturdy front-end and back-end components to developing intricate systems.
- Engaged in a 4-week team development project during the course where we introduced new features to an existing codebase and used the Kanban task-management style along with Git version control.

PREVIOUS WORK EXPERIENCE

Shop Manager

Ladbrokes   05/2007 - 07/2021   Birmingham, UK
Gambling Industry

- Managed daily operations of the betting shop, including opening and closing procedures, cash handling, and inventory management.
- Hired, trained, and supervised a team of 5 staff members, providing coaching and guidance to achieve performance targets.
- Developed and implement effective sales strategies to drive revenue growth by 5%, including promotions and special offers.
- Managed the shop's budget, including forecasting and reporting on financial performance to senior management.
- Maintained a high level of customer service by building relationships with regular customers and addressing any concerns or complaints.
- Implemented and maintained effective systems and procedures to ensure the smooth running of the shop.

EDUCATION

Software Development Bootcamp

Boolean UK
09/2022 - 03/2023   BIRMINGHAM,UK

MBA, International Business

Birmingham City University
09/2007 - 11/2009   Birmingham, UK

Masters in Management

Bangladesh University
2002 - 2003   Chittagong, Bangladesh

SKILLS

Technical Skills

`JavaScript` `HTML` `CSS` `PostgreSQL` `Express` `React` `Node.JS` `VS Code` `Git` `GitHub` `OOP` `TDD` `Agile` `APIs` `Relational Database` `Prisma`

PROJECTS

Sport App

https://sport-app.onrender.com/

- Developed a sports web application using React, CSS, and JavaScript that allows users to create account and login the app where user can get information regarding the sports results. Features are as below:
- A user can view a list of all sports.
- Click on a sport from the list of all sports.
- When a sport is selected, the page shows the related info of that particular sport.
- View the results of the selected sports
- View the latest news of the sports around the world

Cohort Manager 2.0

- Worked on a team project to develop a CRUD application using JavaScript, React,CSS, Express and PostgreSQL for managing a student database.
- Worked done: As a backend developer I wrote issues for the project from the epic. Broke down the issues into smaller issues so that coding can can be done in due time and divided the work into the team members as I was a SCRUM master too to coordinate among other teams. I wrote the codes in backend for the project in YAML files to configure the application's database settings and also did CRUD for the front-end teams.

ACHIEVEMENTS

✔ **Coordinated a front-end team**
   ***Leadership and Strength

I successfully guided a team of developers for two weeks as they produced a front-end project with over 3000 lines of verified code. By merging several commits, I showed my expertise in technology and commitment to the team's success. This considerably increased the project's functionality and dependability.

💎 **Participated in a Backend project with 12 devs**
   ***Team Work and Communication

Strong communication skills and technical expertise enabled me to collaborate with my team to identify and solve various issues on a challenging project that required front-end and back-end integration. I demonstrated problem-solving skills by pinpointing the specific lines of code causing issues and working with the team to modify the code and integrate it with other systems. As a result, we were able to successfully complete the project on time.
